General Hospital = The hospital that houses Neuro ICU, Trauma/Surgical ICU, and a General Medical ICU
Memorial Hospital = The cardiac focused hospital with CICU and CVICU and the academic resident MICU team and Safari MICU. There is a second SICU at Memorial that is a shared MICU where Safari team will also see patients.
Bootcamp = Intern training covering multiple service lines/specialties/and learning the hospital and work flow. Also allows for study time for boards.
CICU = Cardiac ICU, TVP, STEMI, smaller microaxial flow pumps, IABP
CVICU = Open heart ICU, s/p CABG, ECMO, large micro-axial flow pumps and all forms of MCS
Memorial MICU = Academic resident MICU team at Memorial Hospital
Sim = Simulation elective designing and executing high-fidelity simulation
Safari = First year fellows work as independent MICU provider reporting to an attending. As second year "pretending" works with the APP and Attending only there as supervisory role. Works directly with the APP to cover the unit and lead the team.
Ultrasound = self-guided POCUS to acquite images and work towards critical care echo boards
Bronch Lab= Dedicated bronchoscopy time
General NSICU = Neuro ICU block
Research = Time to work on QI and research projects
STICU = Trauma ICU; level 1 w/ the trauma critical care surgeons
INOVA = Required away rotation at INOVA Schar Heart and Vascular in Fairfax, Va where there is heart transplant exposure and further MCS training

Electives:
MET = Rapid response team
Palliative
Scholarship = More time to dedicate to QI and research
