

Child Clinical Psychology Specialty Track

2 Intern Slots Available!

For those applicants interested in specialty training for Children and Adolescents, the Child Clinical Psychology Specialty Track (CT) will be accepting applications for a 1-year training opportunity beginning in July 2024.

Specialty Mentorship and Training:

- CT interns attend all General Track seminars, supervision seminars, and didactic presentations.
- Plus: Biweekly interprofessional child case consultation meeting and a child development seminar.

Required rotations include:

1. Outpatient Psychotherapy Rotation: Interns on the CT would primarily be providing specialized, evidence-based treatments in the CAMC Behavioral Medicine Department. These would include Parent Child Interaction Therapy, Trauma Focused Cognitive Behavioral Therapy, Family Based Treatment, Dialectical Behavioral Therapy for Adolescents, and working on interprofessional teams (e.g., eating disorders, DBT).
2. Child and Adolescent Psychological Assessment: Interns on the CT will complete 10 child or adolescent integrated reports during the training year. A variety of assessment types, ages, presenting concerns will be available to the CT interns, including psychological evaluations, assessment of ASD, neurocognitive assessment, specialized tools including the ADOS, and forensic assessments.
3. Psychological Consultation Rotation: Interns on the CT will participate in Pediatric specialty clinics alongside medical specialist colleagues, with options including FACES clinic for cleft affected children, hematology/oncology, pulmonology, cystic fibrosis, endocrinology, neurology, gastroenterology, and adolescent health.

Match #163711)

Application Deadline: November 15, 2023

Virtual Interviews will take place in January 2024.
